

Protect. Contain. Secure.

## Castle® Hand and Machine Stretch Films

Mac Papers and Packaging is pleased to offer its exclusive Castle® brand stretch films that deliver reliable and consistent performance for your most demanding needs. Castle stretch films provide high-quality cling, superior load containment and high levels of puncture and tear resistance. Offered in hand and machine length rolls, Castle stretch films are inventoried at a Mac Papers and Packaging location near you and are available for next-day delivery.

### Features and Benefits

**Castle® Hand Films:** Multiple options – cast films with a high level of clarity, superb strength and resistance to puncturing and hand film that's notable for immense cling and rigidity.

**Castle® Machine Films:** Multiple options – two-sided cling cast films designed for medium speed applications with superior containment; two-sided cling cast films with high levels of pre-stretch ability and enhanced strength that contributes to less film usage and can support larger loads; and one-sided cling cast films used for high-speed wrapping applications with reliable performance features.

**Castle® Boxed Machine Film:** Designed to protect and transport less than a pallet load of film, making product easier to handle, move and store.

**Castle® Pre-stretched Films:** Provide aggressive cling properties and are lightweight and easy to use, allowing reduction of operator fatigue. They also provide a high load compression and increased containment for reduced product damage during shipment.

*We sell & service equipment too!*
