Mac Papers Expands its Castle™ Packaging Line with Stretch Films

Castle stretch film offering includes hand and machine length rolls as well as boxed machine film

JACKSONVILLE, Fla. (March 15, 2018) – Mac Papers, one of the largest merchant distributors in the Southeast U.S., announced today that it has added stretch film to its Castle™ packaging products line. The company launched its exclusive Castle brand earlier this year with the introduction of Castle acrylic tape.

“We’re extremely pleased to now offer stretch film as part of our Castle brand of packaging products,” said Chris McCabe, vice president of packaging at Mac Papers. “We are dedicated to providing our customers with best-in-class packaging products and services and our Castle acrylic tape and stretch films help us deliver on that commitment.”

Castle stretch films are offered in hand and machine length rolls. The company’s website – macpapers.com/castle – lists product specifications as well as features and benefits of Castle stretch film, including high-quality cling and superior stretching performance and puncture resistance.

In addition to machine film transported in pallets, Mac Papers also offers a boxed Castle machine film option, enabling ease of handling, moving and storage.
